Springfield, MO, 65809

We hope you had a great time & generated interest for amateur radio activities in your community. We look forward to hearing from you! Did you remember to inform your local TV, news paper, and radio stations know what you where doing? Remember that each year you can build upon the previous year's activities, and year-after-year involve more people.

Have fun with this event, but remember to protect people from electrical and radio frequency power emissions at all times! We suggest appointing a Safety Officer to oversee all your activities, and to be especially watchful of the young and non-hams. We assume no responsibility for your activity.
